

GANIPSETTY LOHITH

AI Engineer | Full Stack AI Developer

lohith.ganipsetty9999@gmail.com • +91-9160184550 • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building production AI applications, multi-agent systems, and full-stack web platforms. Experienced across the full development lifecycle, from building Next.js frontends and FastAPI services to fine-tuning LLMs with QLoRA and deploying applications on AWS. Cybersecurity background, with a focus on shipping reliable, real-world AI products rather than just prototypes.

EXPERIENCE

Technical Intern — Dream Olympic Sports Pvt. Ltd.

April 2025 – Present

- Built and shipped features for an enterprise multi-agent AI platform, pairing a Next.js frontend with high-performance FastAPI services on the backend.
- Integrated RAG pipelines and LLMs to power context-aware conversational agents across the platform.
- Performed continuous pretraining and QLoRA fine-tuning of domain-specific LLMs using Hugging Face Transformers and PyTorch, improving response accuracy for sports-related queries.
- Added OAuth-based authentication and modeled PostgreSQL schemas to support secure, multi-tenant access across the platform.
- Deployed and maintained services on AWS, and designed REST APIs for cross-team integration, using Git, Bitbucket, and CI/CD to keep releases smooth.

PROJECTS

DreamOlympic.ai — Enterprise Sports Intelligence Platform

Multi-Agent AI • LLM Engineering • Full Stack Development

- Built an enterprise AI platform that helps users search internal documents, answer sports-related queries, and support business workflows through specialized AI agents; developed the frontend with Next.js and React and backend services with Python and FastAPI.
- Set up RAG pipelines that improved contextual document retrieval and reasoning, and fine-tuned domain-specific LLMs with continuous pretraining and QLoRA using PyTorch and Hugging Face Transformers.
- Designed the agent orchestration layer so each specialized agent (recommendations, document Q&A, deal assistance) could be extended independently without breaking the others.
- Added OAuth authentication and PostgreSQL data modeling to support secure access and reliable storage, then deployed and scaled the platform on AWS.

Technologies: Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, OAuth, AWS, LLMs, RAG, QLoRA, PyTorch, Transformers

MediVision AI — AI-Powered Healthcare Intelligence Platform

Deep Learning • Computer Vision • Healthcare AI

- Developed an AI-powered application that extracts information from scanned medical reports using OCR and computer vision, then uses LLMs to generate structured summaries and answer user questions through an interactive chatbot, allowing users to quickly understand medical reports.

Technologies: React, Python, TensorFlow, PyTorch, OpenCV, OCR, Deep Learning, LLMs, REST APIs

GitHub Repository: github.com/ganipsettylohith/MediVision-AI

NetTrace Live — Real-Time Network Monitoring & Traffic Analytics

Networking • Cybersecurity • Python Development

- Developed a Python-based network monitoring application that captures live packets using Wireshark, analyzes TCP/IP traffic, and visualizes network activity through an interactive dashboard for protocol analysis and troubleshooting.

Technologies: Python, Wireshark, JavaScript, TCP/IP, Packet Analysis, Data Visualization

GitHub Repository: github.com/ganipsettylohith/NetTrace-Live

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, HTML, CSS

Frontend: Next.js, React, Tailwind CSS, Bootstrap

Backend: FastAPI, Django, REST APIs, OAuth, JWT

AI & Machine Learning: Deep Learning, LLMs, RAG, Multi-Agent AI, QLoRA, Hugging Face Transformers, PyTorch, TensorFlow, Computer Vision, OCR, NLP

Databases: PostgreSQL, MySQL, Vector Databases (pgvector)

Cloud & DevOps: AWS EC2, Docker, CI/CD

Version Control: Git, GitHub, Bitbucket

Networking & Security: Wireshark, TCP/IP, Packet Analysis, Cybersecurity

CERTIFICATIONS

Python Full Stack Development Certification — Career Bridge IT Services • Python Essentials 1 & 2 — Cisco • Software Engineering Certification — IBM

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering (Cybersecurity)

Swami Vivekananda Institute of Technology, Secunderabad

Graduated: July 2025
